Profile

I am an experienced Fullstack Engineer with a proven track record in building large-scale web services and modern applications. My expertise encompasses a range of technologies such as Vue.js, React, Vitest, Typescript, Express (Node.js), Docker, and more. I specialize in developing software products designed for handling extensive data and traffic, adhering to agile methodologies and industry standards. Committed to open solutions, I prioritize modularity, component reusability, and consistent performance. I collaborate effectively to uphold the highest quality standards, creating visually appealing and efficient web applications through my proficiency in frontend frameworks, backend technologies, containerization, and design tools.

Professional Experience

Founding Engineer

Jobroute AI 

11.2023

Lagos, Nigeria

System **Planning**, **Design** and **Architecture**.

Artificial intelligence integration with OPENAI.

User **Authentication** and **LinkedIn profile** import.

Code reviews, tests and deployment.

Server performance and Monitoring.

Fullstack Engineer / Contract

commuinify 

02.2023

PortHarcourt, Nigeria
