Profile

I'm an experienced Fullstack Engineer with a proven track record of building large-scale web services and modern applications. I specialize in creating high scalability and adoption rates, implementing agile methodologies and adhering to industry standards.

My proficiency with Vue.js, Ionic framework, Typescript, express (nodejs), vite, Quasar Framework, nuxt, firebase, docker, graphql, web sockets, supabase, hardhat, ethers.js, wordpress, butter cms, vuetify, tailwind, figma, dribbble, and many other tools and technologies enables me to build robust and scalable web applications.

I'm committed to developing open solutions that prioritize modularity, component reusability, and dependable performance, and I work collaboratively with colleagues to ensure the highest standards of quality.

With my expertise in frontend frameworks, backend technologies, containerization, and design tools, I can create visually appealing, efficient, and dependable web applications.
